An Overview

“New Decision Therapy changed my life! This process helped me quickly and efficiently clear years of emotional sludge from my system without having to dredge up every past, painful incident in exhaustive, gory detail... Within 5 private sessions with a Certified NDT Practitioner, I felt like a new person: light, happy, free, and full of smiles!

The secret to such remarkably speedy changes, mine being one example amongst thousands, hinges around the way of forgiveness that one is led through in a New Decision Therapy session, coupled with a procedure unique to NDT called ‘clearing the three layers of denial’.

This procedure opens up energy pathways so that important information that has been stored and forgotten about in the unconscious can be accessed, examined and brought to a state of full healing and resolution using the NDT forgiveness process. Focused eye-mirror attention effectively plants a 'new decision' in cellular memory. The changes are instant and permanent!

When I first heard the word 'permanent', I admit that I was skeptical. Now that 12 years have passed with no return to my former state of unhappiness, I feel totally confident to say that the changes for me have indeed been permanent."

Chapter Highlights

Chapter 1: The Healing Power of NDT

In recent years, the power of the mind to influence the body has been recognized and accepted by the Western world. It is now well known that beliefs, emotions, and feelings have a profound effect on the body. New Decision Therapy™ (NDT) works by uncovering the root of illness: toxic emotions and memories resulting from past insults and injuries. Once painful feelings are brought into the light of consciousness, release and healing can begin. Having released your past, the past is released from you, and you are now able to live fully in the present. NDT is a quick, targeted, effective, and permanent therapeutic intervention.

Chapter 2: What Is New Decision Therapy?

New Decision Therapy (NDT) uses contemporary psychology and clinical kinesiology to stimulate emotional release of toxic residue stored in the physical body on a cellular level. Equally effective for both adults and children, New Decision Therapy is a thorough and precise tool for healing the body, mind and spirit. It is highly effective in physical illness, personal relationships, post traumatic stress disorder, and addictions.

An Overview

Chapter 3: Your Body Tells the Truth

The essence of our being is a field of awareness that relays information between mind and body. While our minds continue to grow, our emotions may be arrested at an early age. To establish a template for forgiveness, a muscle test is performed to reveal: What happened? Who did it? And when?

Chapter 4: Create a Pathway to Forgiveness

Life force or Ch'i energy travels along predictable pathways in the human body. NDT removes the memory of an illness at the cellular level, opening these pathways and preventing the tendency for illness to recreate itself.

Chapter 5: Your Tragic Flaw

When a particular negative pattern is replayed again and again, the insult to your emotional being becomes an intrinsic part of the belief system from which you live your life. It acts like a template for your experience, pulling strings outside of your conscious awareness, hiding the fact that you are inflicting your own pain. Tragically, this repetition is the source of self-sabotage. You cannot avoid your tragic flaw; its lesson will reappear until it is released consciously.

“Kandis Blakely’s New Decision Therapy process has truly changed my life. I went to her in a time of need and was immediately transformed with her powerful methods that healed the wounds I had. As an added bonus, I was amazed that I gained strength and a great direction to lead me down a wonderful new path for my life in a way I didn’t even know I was searching for.

This process is very effective so don’t do it if you are not ready for huge positive changes in your life. Beautiful things will happen within hours and even minutes of completing the process. Since I was cleared of what was slowing me down, my life is moving in ‘fast forward’ to attain the goals I have set for myself.”

Chapter 6: Roadblocks to Health, Happiness, and Prosperity

Many people encounter roadblocks on the highway to success. Because of these roadblocks, every route that you try and every action that you take comes up short of your destination. The Tee Shirt Theory describes the conflicting message between the conscious and the subconscious mind, which erects the roadblocks.

Chapter 7: Denial Is a Dead-End Road

We cannot forgive that which we cannot remember. The conscious mind filters out painful experiences in order to protect us from hurtful feelings. Unexpressed emotions become suppressed. Clinical Kinesiology is not a parlor game. **Layers of denial must be removed** from the body before any consistently accurate results can be achieved with clinical kinesiology.

Chapter 8: Steps to Forgiveness

Your consciousness conceives, governs, constructs, and actually becomes your mind and body. To be truly healthy, it is essential that you first recognize your mental attitudes. Health cannot happen until you've searched within and determined the underlying emotional component of your illness. NDT brings you the ultimate healing tool of forgiveness in simple, step-by-step, digestible pieces.

Chapters 9-13: The Five NDT Sentences

These chapters discuss the five healing NDT sentences in detail.

“Words cannot fully describe Kandis or her brilliant therapy. It is something that has to be experienced to fully comprehend its effectiveness”.

Diana A. Toronto, Canada

Chapter 14: Mirror, Mirror

Your eyes reveal your deepest feelings. In NDT, you face yourself in the mirror. What do you see? Whose images come forth? What feelings emerge? These are people you are still holding onto because you want something from them. As you look at them through your own eyes in the mirror, you begin the release process. This is the power of NDT.

Chapter 15: A Therapeutic Intervention Against Stress

The inability to handle stress is a primary factor in disease. Prolonged states of fear, guilt, and anger can result in tissue damage and a compromised immune system, ultimately expressed as illness. NDT breaks the vicious cycle.

Chapter 16: Treating Depression With NDT

Depression is at epidemic levels throughout all facets of society. Depression is a psychological condition that changes how you think and feel and also affects your social behavior and sense of physical well-being. It causes pain and suffering not only to those who have the disorder, but also to those who care about them. NDT offers a clear, honest and effective way out of oppressive and stifling feelings that accompany the anger, shame and guilt that we have bestowed upon ourselves.

Chapter 17: Applying NDT in Your Daily Life

An individual can perform New Decision Therapy™ anytime and anywhere. This simple yet profound technique offers personal empowerment and liberation. NDT offers you an opportunity for growth, for joy and for a healthy quality of life. Simply follow the five easy pieces of NDT.

An Overview

All of the above and more is contained in the book *Heal Your Life Now: The Alchemy of Forgiveness*. This book was written for you.

“I had a New Decision Therapy session with Kandis Blakely a few months after September 11, 2001. I was in New York City, where I live, on Sept 11, and was truly shaken up by the whole experience. I was terrified that something else would happen and my daughter, who was just a few months old at the time, would be killed. Also, I had already been afraid to fly before Sept 11, so you can imagine how scared I was to fly after, especially in and out of my home, NYC!

Actually, I had many fears; I had struggled with fear all my life. As soon as I walked in the door for my session, before I'd said a word about any of this, Kandis asked me what I was afraid of. From that second on, we worked on my fears, and although I'd tried to address them before in several years of talk therapy, I can trace the turning point in my fears to that NDT session. After that one session, I was no longer afraid to fly! (We hadn't even talked about flying in my NDT session, but we worked hard on how I lived in fear all the time, and it automatically cleared my fear of flying.)

I remember the first time I flew after my NDT session. My husband sat beside me on the plane waiting for me to hyperventilate like I usually did during take-off, and I just sat there calmly and smiled at him. Neither of us could believe it. I felt a little excited and apprehensive, but I just didn't feel the crippling fear anymore.

Also, Kandis and I worked on forgiving people in my past, and I ran into an ex-boyfriend with whom I'd had such a difficult experience that I still had nightmares about him sometimes. We had our first pleasant conversation in years, and I surprised even myself when I gave him a quick hug goodbye and wished him the best, truly feeling the warm wishes from my heart. I haven't dreamt of him or run into him since!

The mind/body technology that Kandis has developed, New Decision Therapy, is an elegant and simple technique that people can readily incorporate into their lives to forgive, let go of the past, and move ahead with their real, joyful lives!”
